Joe is a 29-year-old man who likes to optimize his savings and time at the grocery store. He uses the Grocery Getters app to find savings in items and creates multiple lists for different grocery stores.

Before Joe goes out shopping, he opens the Grocery Getters app and it displays the main menu.

Store Name	Distance (km)
Coop	4
Superstore	10

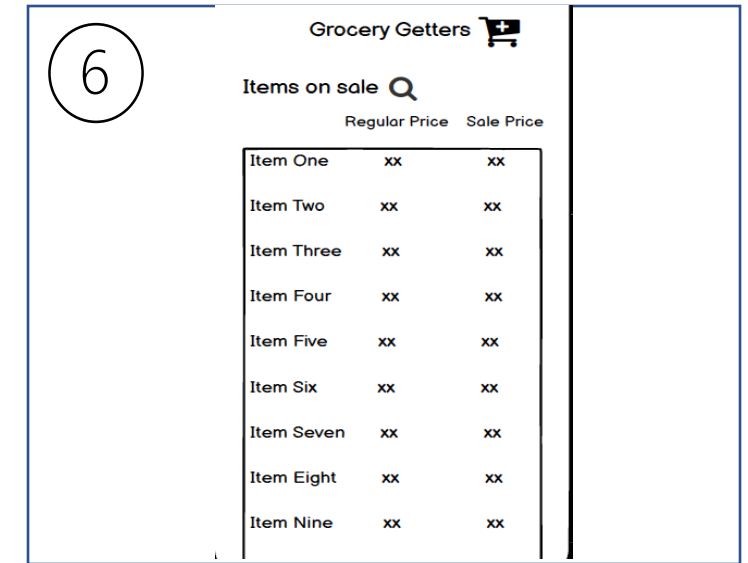

Joe will use the map feature to decide which grocery stores he will shop at. Ideally, he will shop at both Coop and Superstore to maximize his time and savings.

Joe creates one of his lists associated with the first store he selected.

In the search bar, he will query the grocery item he wants to buy.

Using the filter, he only searches for items that are on sale or clearance for that specific store. He will also exclude items that are sold out.
